

BASIC SHAPES

Square
Rectangle
Circle
Triangle

Tips for Complex Users:

- Only show one printed page at a time, on a white tabletop, board, or light table.
- Use finger LEDs to trace each shape and to highlight specific objects.
- Introduce 3D tactile objects whenever possible to reinforce 2D images.
- It is recommended to cut the 2D objects on cardstock, and show one image at a time.

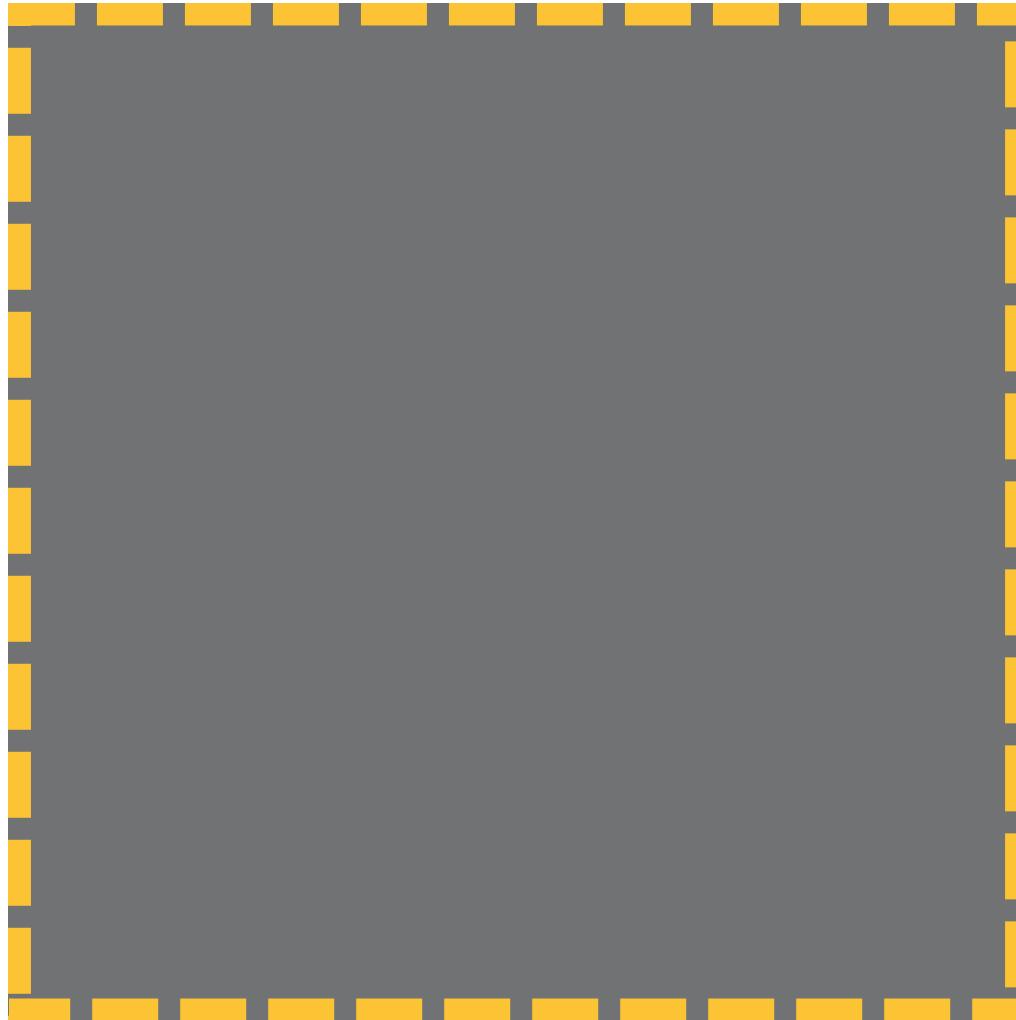

square

If text is too visually complex for your child, then cut off or fold over the lower portion of the paper.

Copyright © 2025 Carethriving™

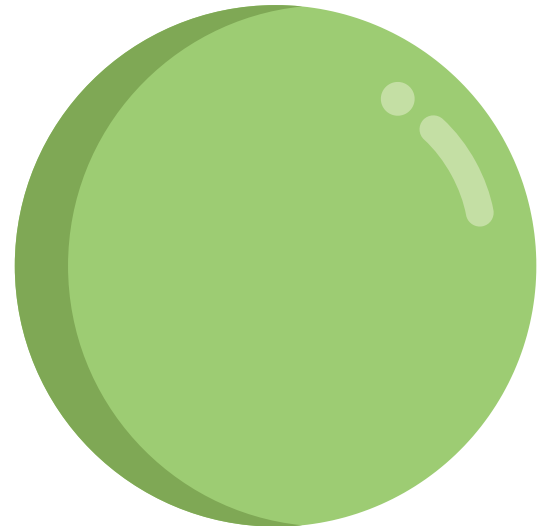

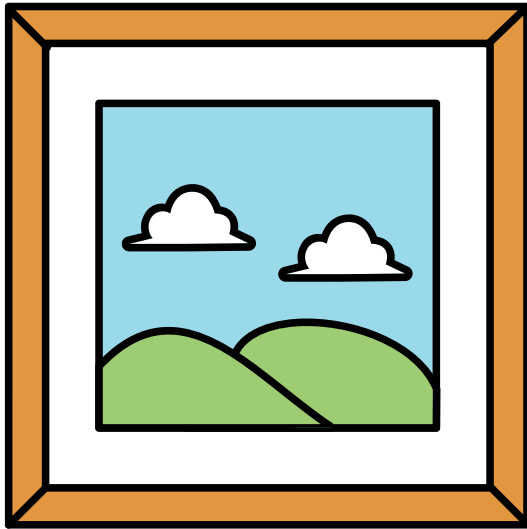

Help your child trace the outline with their eyes, finger, or crayon., while counting each side.

square

Either pre-cut shapes and have your child place them on top of the red master shape, or have them identify the correct objects vs the object that does not belong..

Help your child trace with their eyes, finger or draw a line between the matching shapes.
